HOW TO GENERATE THE XML FEED?

USER AUTHORIZATION

- A user who wants to generate a feed must be granted "Admin" or "Feed" permission.

- A new "Feed" role is created in the administration for this purpose

GENERATION PROCEDURE

1. User access

After logging into the B2B e-shop, the XML feed is available via the url https://b2b.jablotron.com/en/feed/products

| C △ ▲ b2bjablotron.com/en/feed/products | \$ | | | | |

2. Program access

Here it is necessary to verify using Basic authentication. For program access, we recommend creating a new user who will only have "Feed" permission and will therefore only be used to load the XML feed.

Basic authentication is a simple authentication scheme built into the HTTP protocol. The client sends HTTP requests with an Authorization header that contains the word Basic followed by a space and a string encoded in base64 username:password.

Example of getting a feed using cURL:

curl --location --request GET 'https://b2b.jablotron.com/feed/products' --header 'Authorization: Basic xxxxxxxxxxxxxxx'

LIST OF FIELDS IN THE XML DOCUMENT

| PRODUCTNAME | Product designation | | |
|-------------------|---------------------------------------|--|--|
| PRODUCT | product name | | |
| SHORT_DESCRIPTION | short label | | |
| LONG_DESCRIPTION | long label | | |
| SPECIFICATION | technical specification | | |
| URL | link to the product on the B2B e-shop | | |
| IMGURL | product image | | |
| PRICE_WITHOUT_VAT | Your price | | |
| CATEGORY_TEXT | product category on B2B e-shop | | |
| EAN | | | |
| AVAILABILITY | availability | | |
| TAGS | tags | | |
| IMAGES | product images in various sizes | | |
| FILES | files to download | | |

LIST OF VALUES

The list of values they take for availability and tags:

Availability:

- In stock
- On request

Tags:

- New
- Action
- Clearance sale
- Terminated
